Signal discovery app: explore what signals are available in Delphi Epidata

epiprocess: R package for common epidemic signal processing utilities

Modeling work: forecasting, hotspot detection, nowcasting

Epidata API: serves new epidemic indicators daily, and historical "as-of" queries for training models

epidatr and epidatpy packages: R and Python packages for data access

epipredict: R package for modular forecaster development

Epidata repository of real-time epidemic indicators (signals): up-to-date, geographically-detailed indicators of epidemic/pandemic activity across the United States (and to lesser extent, globally)
